

PATIENT ROOM

RECESSED LINEAR

Mounted on 6 FT centers, parallel to the patient bed, recessed linear fixtures offer an architectural solution for ambient and exam mode. This easily meets the IES recommendation of 50 FC for exam.

RECESSED TROFFER

The recessed troffer offers a single fixture solution with even ambient light on and around the patient bed. The addition of a step light aids in night time way finding.

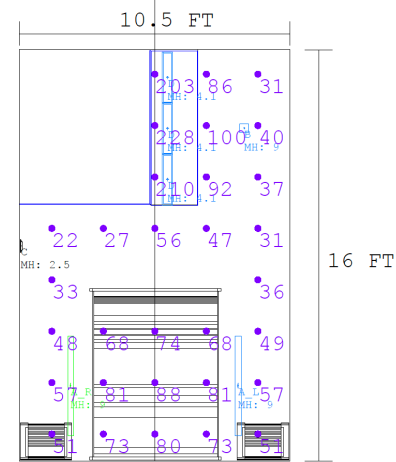

RECESSED TROFFER WITH DECORATIVE WALL SCONCE

The combination of an architectural recessed troffer and decorative wall sconce offer a residential feel for patient comfort and well-being.
