

PRIVATE OFFICE

2X4 RECESSED OPTION

Two recessed 2x4 high efficient architectural troffers have the ability to provide the desired IES recommended light levels in a typical small private office. Implementing volumetric lighting easily fills design requirement.

A

LINEAR RECESSED OPTION

Two Linear 4-foot recessed luminaire centered within a small typical private office can achieve IES recommended light levels. Slim sight line minimizes the ceiling clutter while providing uniformity with the proper softening lens.

B

ROUND PENDANT OPTION

Pendant 3-foot Round direct/indirect luminaire achieves IES recommended light levels while also creating volume by lighting the ceiling. The direct/indirect approach allows for greater dimming control while mitigating the problematic glare.
