MINIMALISM MEETS MINISCULE

Clean, modern and miniature, Lines mimics the height and width of the Portal pendant, and shares the same narrow-gauge integrated power and suspension cord. The three distributions, multiple pivoting luminaire and wall connections, three distinct endcaps, and three powdercoat finishes give way to immeasurable design potential.

Direct and indirect optics address a broad range of applications with exceptional uniformity and lower energy densities.

Proprietary optics internally refract, reflect and mix light to transform individual bright point sources into a homogenized spread of light with accurate and consistent color.

Precise control and extraction features shape the light into high performance distributions with maximum visual comfort and efficacies exceeding 140 lm/w.

LENGTHS

All fixtures are factory pre-wired. Joints, endcaps and pivots are factory preinstalled up to a maximum shippable length of 8 ft.
Section lengths can be joined together to create any row length beginning at 2' and continuing in 1' increments.

KORUOLMAT

CONTROLS + SENSORS

Our flexible integrated mounting options provide easy installation for any ceiling conditions. Agnostic electromechanical design simply integrates with lighting control protocols such as 0-10V, DALI, and a variety of energy management systems.

0 - 10V DALI

AcuityControls > DISTECH CONTROLS

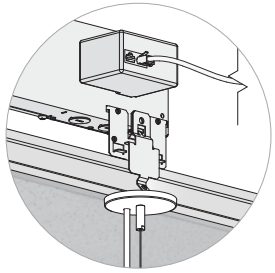
LEVITON EATON CRESTRON

enlighted®

Enlighted wireless, networked smart sensor integrates occupancy sensing, daylight harvesting, energy usage, temperature and light level control.



nLIGHT®

nLight wired, 2-way network supports luminaire light level control as well as occupancy and daylight sensors.

eldoLED®

EldoLED drivers support common wired protocols, 0-10V and DALI. They also provide access to finer dimming control, dynamic white and Bluetooth low-energy (BLE) wireless.

LUTRON®

Lutron EcoSystem network protocol enables on/off, dimming, occupancy sensing and daylight harvesting capabilities.

INTEGRATED DRIVERS

Prewired and fully tested drivers are integrated with specialized mounting hardware, power feeds, suspension cables, cords, and canopy components. Designed for multiple orientations and to accommodate a variety of ceiling conditions. Elements can be installed in advance or with fixtures, for new construction or retrofit applications.

DESIGNED WITH YOU IN MIND

When you order Fluxwerx products, you don't just get high quality luminaires, you get instant online quoting and documentation tools, simple order processing, customer service support and contractor-ready shipments. Everything you need to ensure fast, accurate delivery for the tightest project schedule.

SAME DAY QUOTATIONS. INSTANT DOCUMENTATION.

Our online quotation system is designed to build a complete project quote from millions of possible configurations in a matter of minutes, without having to call the factory. Plus, you can download all the drawings and details for your specific project immediately after building your quote—or making revisions to an existing quote. No waiting and no down time.

SERVICE RESPONSE WHEN YOU NEED IT

We understand that questions pop up fast, and receiving answers quickly is crucial to moving ahead with your project. We measure our response time in minutes, not hours or days. When you need answers, we're here to help. Contact us and a member of our Service Team will answer—no switchboards or operators.

SEAMLESS + SIMPLE

Invisible design details require no electrical connections at fixture joints, creating virtually seamless continuous runs that are simple to install and speed construction. To minimize installation time and ensure precision alignment, all our fixtures arrive with endcaps and power drop cords factory installed, and drivers are pre-wired and tested for every circuit.

DETAILS THAT MATTER

When you're on the job site, time is money. That's why all of our shipments come with spare parts and tools to save time. We also include consolidated and color coded wiring diagrams, installation instructions and project documentation, so that installers have the information they need at their fingertips. Look for the box with the yellow label marked CONTRACTOR CARE KIT.
