

# SPECTRAL DISINFECTION

Healthcare Associated Infections (HAIs) can cost healthcare facilities millions of dollars. Light as a disinfectant in medical facilities and healthcare operations can reduce the number of HAIs which in turn, saves the facility money. Learn about two important types of spectral disinfection lighting: Ultraviolet and Visible Light Disinfection.

## LEARNING OBJECTIVES OF THE COURSE:

- Understand the challenge of Healthcare Associated Infections (HAIs).
- Learn about spectral disinfection.
- Understand the difference between Ultraviolet (UV) and Visible Light Disinfection (VLD).

Available as a  $\frac{1}{4}$  credit (15 minute) and  $\frac{1}{2}$  credit (30 minute) presentation.
